

Introducing the next evolution in home security. Control energy, lighting, door locks and more.

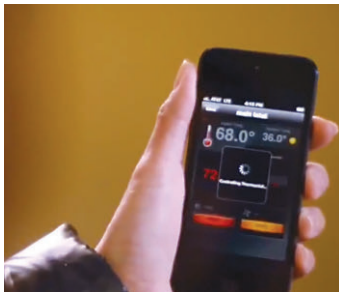

ULINK Home Automation from Alarm Detection Systems is a lifestyle-enhancing solution that extends the capabilities of your ADS security system. Control your thermostats, lighting and locks with ULINK enabled devices — making your home more comfortable while reducing energy costs.

With ULINK Home Automation add-ons you can easily:

- Adjust thermostats automatically every time you set your alarm
- Turn select indoor and outdoor lights on or off when you access your system
- Lock and unlock your doors automatically
- Create and control lighting schedules while you are away

Home Automation add-ons are controlled by the same ULINK app that works with ADS security systems

Thermostat

Lights

Exterior Door Locks

Choose smart phone enabled security from Alarm Detection Systems and you can manage your home security environment from virtually anywhere.*

Call **630.844.6322** for more information

*Smart phone access varies per model. Home automation services may require the purchase of additional equipment.
