

Local, Professional Fire Alarm Monitoring from ADS IT'S THE SMART CHOICE

**Unmatched speed and reliability in delivering wireless alarm signals to the central station
— without any reliance on third-party networks.**

Alarm Detection Systems owns and operates a proprietary wireless network, providing multiple paths of communications to our award-winning central monitoring station. Our radio network is a reliable technology for applications that need to communicate data over a large geographic area at a low monthly cost. As a primary or back-up solution, AES radio features NFPA 72 fire, UL864, and UL-AA burglary monitoring for integration with your commercial alarm system.

Fire alarm monitoring from Alarm Detection Systems features:

- Substantial savings when replacing phone lines for alarm reporting
- A single radio that can be used for security & fire alarm systems (primary or back-up)
- UL-AA burglary & NFPA 72 compliancy
- Accessible support staff from a family-owned, local company

MEMBER OF

Go with the trusted security leader in Illinois since 1968. Alarm Detection Systems can take over your monitoring at a significant discount over what you are paying now. We carry many advanced radio systems to fit your business. Your property will be monitored locally by our 24-hour, UL Listed, FM Approved, Five-Diamond certified central monitoring station.
