

## Know Exactly Where Your Vehicle Is at All Times. Be notified immediately when boundaries, speed limits or time frames are violated.

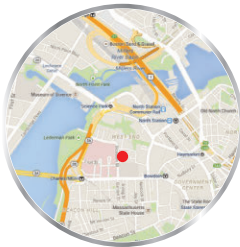

ULINK™ GPS is an accurate, user-friendly system that provides you with real-time vehicle tracking from any Internet-enabled device. You can view the date, time, location, and even speed of travel. These remote features work with existing ADS ULINK™ services. This system is ideal for residential vehicles.

### For Teen Drivers:

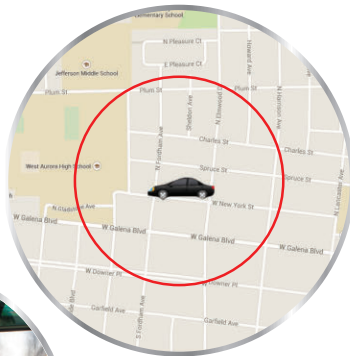

- Know that your teen driver arrives at destination safely
- See where they went, how fast, and how long they stopped
- Ensure they are driving only where permitted
- Receive alerts when speeds, boundaries and curfews are violated
