

Live Independently with Peace of Mind.

eCare™ Provides Real-Time Monitoring & Assistance When You need it.

Alarm Detection Systems offers a wide-range of medical alert (eCare™) devices geared toward individual assistance and monitoring. When prompted by an event (such as the user pressing a button on a medical pendant), the eCare™ unit alerts our professional central monitoring station.

Alarm Detection Systems will contact the user via two-way voice monitoring (phone line required) to determine what assistance is needed. Depending on the situation and information on file, ADS will also alert listed contact(s), or emergency personnel.

eCare devices:

- 24/7 emergency assistance monitoring
- No long-term contract
- Easy installation
