

Vacant Buildings Are Vulnerable Targets for Vandalism and Theft.

Real Estate Owned property security (REO) is a short-term, transitional security alarm system which offers property managers similar interior protection to a hard-wired system.

- *No long-term contract*
- *No phone lines needed*
- *Professional, live monitoring 24/7/365*
- *Satisfies many insurer requirements*
- *Sump pump/flood, temperature detection available*
- *Easily upgradeable to a permanent system*

Protect doors, windows, and other entry points with wireless sensors.

Houses

The interior of your building is monitored at all times, alerting our dispatchers when unauthorized individuals gain access. Alarm Detection Systems, Inc. (ADS) will protect your vacant building with multiple points of protection, covering doors, windows, and other key areas. REO building security systems eliminate the need to install any wires and hardware.

Let ADS help you keep your property protected against unwanted threats. A short-term alarm system is a quick, easy solution for keeping your property safe.
